Program Structure

The course features **6 advanced modules** designed to provide in-depth knowledge and practical skills through a skill-based weekend format, ensuring real-world applicability and engagement.

Module 1: Integrating ESG into Business Strategy

Knowledge & Understanding

- Explain core ESG principles and their relevance to business sustainability and competitiveness
- Interpret ESG-related regulatory requirements applicable to organizations

Skills

- Analyse ESG risks and opportunities across business functions
- Conduct stakeholder identification and engagement mapping
- Perform materiality assessment using structured methodologies
- Identify ESG performance gaps in organizational operations

Application / Performance Criteria

- Develop an ESG integration strategy aligned with business objectives
- Prepare an ESG implementation roadmap addressing regulatory and stakeholder expectations

Module 2: ESG Frameworks, Disclosures and Performance Measurement

Knowledge & Understanding

- Describe global ESG frameworks, standards, and rating mechanisms
- Explain GHG accounting concepts including Scope 1, Scope 2, and Scope 3 emissions

Skills

- Apply ESG frameworks (GRI, BRSR, TCFD, SASB, etc.) to organizational reporting needs
- Interpret ESG rating methodologies used by agencies such as MSCI and Sustainalytics
- Select and customize ESG indicators relevant to the organization

Application / Performance Criteria

- Construct an ESG scorecard to measure and monitor performance over time
- Use ESG data as a business intelligence tool for risk mitigation

Module 3: ESG and Sustainable Finance Integration

Knowledge & Understanding

- Explain types of ESG investments and sustainable finance instruments
- Describe ESG integration approaches in financial decision-making

Skills

- Identify and evaluate ESG data sources for investment analysis
- Assess ESG-related risks, opportunities, and material considerations in investments

Application / Performance Criteria

- Apply ESG factors in portfolio construction and investment management
- Analyse climate risk drivers and transmission channels for financial institutions

Module 4: GHG Accounting, Ethics and Corporate Governance

Knowledge & Understanding

- Explain sustainability standards, ESG frameworks, and disclosure requirements
- Describe principles of corporate governance and professional ethics

Skills

- Apply GHG accounting methodologies for emissions measurement and reporting
- Analyse human capital management practices from an ESG perspective

Application / Performance Criteria

- Evaluate governance structures and ethical practices within organizations
- Interpret ESG ratings with focus on governance and social parameters

Module 5: Climate Risk Mitigation and Climate-Related Disclosures

Knowledge & Understanding

- Explain climate change fundamentals and business implications
- Describe climate-related standards, disclosure frameworks, and reporting expectations

Skills

- Conduct climate risk identification and mitigation analysis
- Apply scenario analysis and climate models for risk assessment

Application / Performance Criteria

- Integrate circular economy and water management practices into sustainability planning
- Implement impact measurement and management frameworks

Module 6: Sustainable Finance and Advanced ESG Practices

Knowledge & Understanding

- Explain ESG investment strategies and sustainable finance principles
- Describe financed emissions concepts and PCAF methodology

Skills

- Perform ESG analysis and valuation for investment decision-making
- Develop advanced ESG scorecards and performance reporting mechanisms

Application / Performance Criteria

- Integrate ESG considerations into investment strategy and portfolio alignment
- Address challenges related to ESG data quality, assessment, and disclosure
